

VisorPhone™

The Springboard™ module that transforms your Visor™ into an extraordinary phone.

When you snap the Handspring VisorPhone into the Springboard expansion slot on your Visor, you'll have an **amazingly powerful handheld computer and mobile phone in one**. And since it's a Springboard module, there's no software to install or drivers to load—just snap it in and start talking!

The VisorPhone is completely **integrated with your Visor address book** so you can keep all your names and numbers in one convenient place. Which also means you'll never have to enter—or update—your data twice. And you'll have one less thing to carry.

Dialing your VisorPhone is a real breeze. You can **dial directly from your address book**, quick dial from a custom list of up to 50 numbers, use the dial pad with its big easy to tap numbers, or redial from the Call History log.

In fact, VisorPhone makes using a mobile phone easier than ever before. You can **set up 3-way calls in an instant**, use built-in sentences to

send text messages without even typing, and get **caller ID** that gives you more than just the number of the person who is calling. If that person is in your address book, you'll see their name.

The VisorPhone takes full advantage of the Visor handheld's **large screen display**, so you can actually see the dial pad—and even the letters on each number. There's even big call control buttons when you're on a call so you can see what your choices are. You can also view text messages, manage your speed dial list, and review your Call History log much more easily than on a standard phone. And while you're talking on your VisorPhone you can check your calendar or look up a number. You can even use your VisorPhone as a **wireless modem** to HotSync® remotely. Plus with third-party software and an Internet service provider you can do more, like check email or surf the web.

visor

VisorPhone™ Features

Integrated Address Book

Keep all your contact information in one convenient place so you'll never have to enter—or update—your data twice.

4 Easy Ways to Dial

- Tap any address book entry—we've got all your numbers.
- Quick dial from a custom list of up to 50 numbers.
- Use the dial pad with its big, easy to tap numbers.
- Redial using your call history log.

Caller ID

Get the number and the name of each caller without any programming. It even works with call waiting! And, if the caller's not already in your address book, simply add them in!

Conference Calling

Set up conference calls from your VisorPhone in a flash. If someone calls while you're on the line, it's a cinch to conference them in.

Text Messaging

- Give your voice a rest and send a text message instead—it's more cost effective than a phone call.
- Compose text messages by using Graffiti®, tapping the keyboard, selecting sentences from our built-in list, or combining them with your own text to personalize your message.
- Send and receive short messages to and from an email address—if your network allows it.

Wireless Modem Capabilities

- Use your VisorPhone to HotSync® remotely.
- With third-party software and an Internet service provider you can check email or surf the web.

Plug-and-Play

VisorPhone provides true “plug-and-play” expansion—no need to load any software or drivers, just plug it in and it works!

Phone Coverage (GSM 900/1900)

GSM is an international mobile telephony standard that has the largest number of subscribers in the world. There are four major GSM

service providers in the United States and they operate in distinctly separate areas. Your service provider will depend on where you'll be using your VisorPhone.

Rechargeable Battery

- Uses its own lithium battery so you don't drain the power to your Visor handheld.
- More than 3 days of standby time.
- More than 3 hours of talk time even under weak signal conditions.

Product Information

Weight: 2.9 oz. [83g] with battery
Size: 2.4" [6cm] x 2" [5cm] x 0.6" [1.3cm] (L x W x D)
