

# Parafone™

Stay in constant contact with family, friends and businesses while having access to all your personal information. Check your schedule, record new appointments, add to your To Do list, or simply jot down a memo ... all while talking on the phone. No more punching in telephone numbers, simply dial directly from the address book. Take communications to the next level and communicate through your handheld computer.

In an era dominated by the exchange of information, there is an ever growing need for the integration of communications and information services. The ability to access information is just as important as the need to possess information. The award winning Parafone addresses all these needs, being the first Springboard™ compatible voice telephony module. Parafone provides users of the Handspring™ Visor™ handheld with the most convenient way to communicate: it endows the Visor with cordless telephone capability.

## Key Features and Benefits

- Direct Address Book Dialing   Make a call by simply tapping on a number in the address book
- Call Display (Type I and II)\*   On screen display of the name of the calling party for incoming calls as well as for call waiting
